Heatshield™ Features

The Heatshield™ Thermal Pool Blanket is recognised as the most effective type of cover for pool insulation. Durable and long lasting, Heatshield will significantly reduce your heating, chemical, cleaning and water costs. Consisting of a 3mm thick*, double reinforced, multi-layered construction, the water proof closed-cell polyethylene foam gives the blanket its superior thermal resistance qualities. The impermeable base layer gives the blanket its chemical resistance.

Heatshield™ Benefits

The advantages of the Heatshield™ Thermal Pool Blanket are many, but the most important is the almost complete elimination of water loss through evaporation.

Less evaporation = Less heating costs

The prime purpose of the Heatshield™ Thermal Pool Blanket is to retain heat in the pool water. The temperature of an uncovered pool will fall by as much as 6°C overnight. Your Heatshield™ Thermal Pool Blanket will cut heat loss by up to 75%, reducing your total heating costs (solar, electric, gas etc.).

Less evaporation = Less chemical consumption

Pool chemicals just seem to evaporate from an uncovered pool. The Heatshield™ Thermal Pool Blanket will cut evaporation by more than 99% – you'll save water and reduce your chemical costs by up to 50%.

Less evaporation = Less maintenance time

By installing the Heatshield™ Thermal Pool Blanket, you will virtually eliminate the corrosive condensation that forms with indoor pools, thereby reducing your maintenance costs. Outdoor pools will also be easier to clean, as the blanket helps prevent leaves and debris from entering your pool.

Heatshield™ Values

Heatshield™ Thermal Pool Blanket is manufactured from a quality woven fabric that is formulated to suit Australia's harsh conditions. The reinforced bottom layer provides higher tear strength over standard pool blankets making it the popular choice for commercial applications too. Heatshield™ Thermal Pool Blanket gives better insulating properties than a solar bubble blanket, is more compact when stored and is the ideal pool cover for indoor heated pools. For high volume use, such as commercial pools, each blanket is available with full edge binding and end reinforcing, wind skirts, a flotation pocket, haul cords and a single point attachment harness at each end of the blanket. **Heatshield™ Thermal Pool Blankets have up to 5 years pro rata warranty.**
