

ABGAL Spa Foam Cover Fitting Instructions

About Your New ABGAL Spa Foam Cover

Your ABGAL Spa Foam Cover is designed to reduce heat evaporation, maximise heat retention and keep debris out of your Spa.

What You'll Need to Fit Your Cover

To install your Cover, you'll need a pair of household scissors or knife, a pen or ink marker and another person to hold the Cover in place while you trim it.

Fitting Your Spa Foam Cover

1. Fill your spa to its normal operating water level.
2. Open the plastic sheet supplied with your cover for use as a template for the shape of your spa. (If the template is not large enough to cover your spa, cut the excess off one side of the template or use an extra piece of plastic and tape it together.)
3. Lay the sheet on top of your spa, and using your finger, find the edge of the spa at the waterline and **trace a line** where it meets the spa, with a pen or ink marker. Continue this **line** around the perimeter of your spa.
4. Unpack your Cover and lay the panels together. (For 10mm thick covers only, join using the velcro through the eyelets —see drawing opposite.)
5. Have the other person firmly hold your **template on top of your** Foam Cover, so there is even overlap on all sides, and no gap between the panels.
6. Using your household scissors/knife, cut along the line of the template, and your Foam Cover will be the exact shape of your spa. (If you want to use the plastic sheet for other applications like a painting drop sheet, transfer the shape to the foam cover with a pen and then cut only the foam to shape.)

For 10mm thick covers only, align the eyelets and thread the velcro strip through each eyelet and overlap by 40mm (1 $\frac{3}{4}$ ")

Maximising the Life of Your Spa Foam Cover...

- Do not walk, jump, sit or lie on the Spa Cover at any time.
- Do not drag or slide the cover when moving it. Instead, always lift and carry the cover.
- Store the cover away from rough or abrasive surfaces as these will wear and damage it. Rinse before storing for long periods.
- Clean your cover using a mild soap detergent and rinse well after cleaning. Do not scrub with harsh brushes or scourers.
- Do not leave your Spa Cover in direct sunlight when it is not in use, even for short periods of time!
- Do not allow chemical levels to exceed normal readings on test kit.

Spa Foam Cover Pro-Rata Warranty

Your ABGAL Spa Foam Cover is warranted against faulty workmanship and materials for a 12 month pro-rata period from the date of purchase. In the unlikely event that a fault appears during this time, please return the cover, along with a copy of your receipt to ABGAL. Where a cover is found to be defective, a replacement cover will be supplied at a pro-rata cost, up to the warranty period at the time of purchase. The purchaser is required to pay for the time they have used the cover, and the company will pay for the shortfall between the failure of the cover and the end of the warranty period. The pro-rata period is on a monthly basis, on the suggested retail price at the time of claim. All fabrics can fade in colour and no warranty is given in relation to colour changes. The cover is not warranted against cuts, punctures, abrasions or any damage that has occurred through misuse or negligence, nor is it warranted against breakage.
