

Leafstop™

Pool & Spa Cover

The practical solution for above ground pools

The ABGAL Leafstop cover has eyelets fitted around the perimeter, and is secured using a durable stretch bungee cord (supplied).

For long term coverage, a cable and winch system (sold separately) can be used instead. Simply replace the bungee with the cable, and winch tight.

With some additional fittings from your hardware store, an ABGAL Leafstop cover can also be fastened to a timber deck.

Is your pool too cold?
Made in Australia, an Oasis Solar Cover works with the sun to keep your pool warmer for longer!

A Lower Maintenance Pool

If you're not using your pool regularly, you may enjoy the benefits of a Leafstop cover.

Designed especially for above ground pools, Leafstop is great for closing your pool down over winter, or if you're going away for a few weeks and don't want to come home to a pool full of leaves.

Not just a tarp - Leafstop is shaped to fit most popular brands and sizes of above ground pool. Made from a high-tech, exclusively blended micro-mesh fabric, Leafstop allows fresh rain water through, but keeps birds, leaves and dirt out.

A Leafstop pool cover can stop around 50% of evaporation - which means your pool will consume less chemicals. With no leaves and debris falling in the pool, your vacuum and filter won't have to work as hard either.

A Leafstop pool cover will keep your pool cleaner, reduce chemical use and cut evaporation - saving you time and money!

Quick & Easy to use

With an elastic (bungee) cord in the hem, Leafstop works like a big shower cap. It's simple to install, and easy to remove – even with just one person. If you're looking for a long-term closure, you may be interested in our cable and winch system which replaces the bungee cord.

Fits Most Pools & Spas

Available in a variety of shapes and sizes, there is a Leafstop cover to fit most popular Australian above ground pools and portable spas. Once fitted, the cover should overlap the pool coping on all sides, and pull down tight for a snug fit.

Keep it Clean

A well fitted Leafstop cover will keep birds, leaves and other garden debris out of the pool - and because it blocks the sunlight, your pool is less likely to grow algae - leaving you a cleaner pool when it's time to take the cover off!

Right: This Leafstop cover has been used with 3 pool floats to hold the cover up out of the water so leaves fall to the ground rather than sit on top of the cover. They have also chosen to add some hooks on the wall supports for a neater, tidier finish.

Pool Cover Floats

The use of pool cover floats (above) is recommended to support the middle of the cover, raising it 0.5m above the water level. This prevents leaves and debris gathering on top. Check the guide below to see how many floats you should use with your cover.

Pool Length	No. of Floats
Less than 5.5m (18')	1 to 2
5.5m to 7.6m (25')	2 to 3
7.6m to 9.4m (31')	3 to 4
9.4m to 12.2m (40')	4 to 5
