

AQUALUX™

Pool Finish

The ultimate pool finish

Developed in Australia, especially for the Australian climate, Aqualux won't chip, crack or flake. This commercial membrane is ideal for installation into new pools, and for resurfacing old pools.

Smooth to touch, and incredibly easy to keep clean, Aqualux comes in a range of designer prints and colours to help you create the ultimate pool for your family.

Suitable for commercial and domestic swimming pools of all build types, an Aqualux interior will keep your pool shell watertight for years to come.

Custom made to fit each individual pool from a series of specialised measurements, steps, shelves and benches can all be built in, regardless of your pool brand, make or shape.

Fibreglass, tile, render, paint, pebble and marbelite pools can all be resurfaced with Aqualux for a stunning, easy to care for pool.

- ✓ Won't chip, crack or flake
- ✓ Does not leech chemicals
- ✓ Does not affect water balance
- ✓ Incredibly easy to keep clean
- ✓ Treated to resist algae & fungus
- ✓ Will flex with ground movement
- ✓ Thicker than 15 coats of pool paint
- ✓ UV Inhibitors prevent fade
- ✓ Won't cause grazes or bruising
- ✓ Embossed, non-slip surface
- ✓ Guaranteed for 10 years

Easy to Care For

Aqualux is treated to inhibit algae, bacteria and fungus, and it's naturally immune to things like 'blackspot'. Non reactive to chemicals, Aqualux has no affect on your water balance. It will never need scrubbing, and has the lowest routine maintenance requirements of any pool finish.

Flexible and Strong

A hard pool shell can't handle ground movement - so where finishes like tile, render and fibreglass will crack, Aqualux can flex and return back to position. It is capable of stretching over 200%.

Beautiful Colours

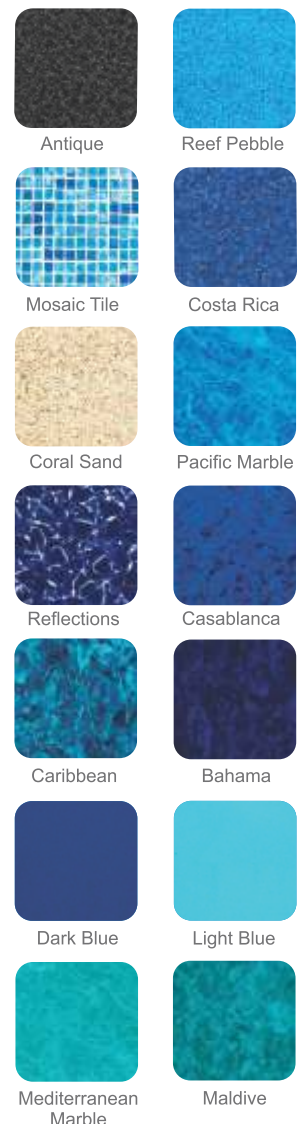

The right colour can really bring your pool to life. Aqualux comes in a range of beautiful colours and prints, with a depth and vibrancy simply not available from other pool finishes. Premium quality pigments, and the addition of UV inhibitors ensure colours stay brighter for longer.

Guaranteed

In a domestic setting, an Aqualux pool finish is guaranteed to keep your pool shell watertight for ten years - and in the right conditions, most will last for years beyond this. See how Aqualux stacks up against alternative pool finishes below - **it's the only one that ticks all the boxes!**
