

The ultimate pool finish

Proven in Australian pools for over 40 years, Aqualux won't chip, crack or flake. This commercial quality waterproof membrane is ideal for installation into new pools, and for resurfacing old pools.

Smooth to touch, and incredibly easy to keep clean, Aqualux comes in a range of designer prints and colours to help you create the ultimate pool for your family.

Suitable for swimming pools of all build types, an Aqualux interior will keep your pool shell watertight for years to come.

Custom made to fit each individual pool from a series of specialised measurements, steps, shelves and benches can all be built in, regardless of your pool brand, make or shape.

Fibreglass, tile, render, paint, pebble and marbelite pools can all be resurfaced with Aqualux for a stunning, easy to care for pool.

- ✓ *Won't chip, crack or flake*
- ✓ *Does not leech chemicals*
- ✓ *Does not affect water balance*
- ✓ *Incredibly easy to keep clean*
- ✓ *Treated to resist algae & fungus*
- ✓ *Will flex with ground movement*
- ✓ *Thicker than 15 coats of pool paint*
- ✓ *UV Inhibitors prevent fade*
- ✓ *Won't cause grazes or bruising*
- ✓ *Embossed, non-slip surface*
- ✓ *Guaranteed for 12 years*

Easy to Care For

With sanitisers added to inhibit algae, bacteria and fungus, and natural immunity to things like 'blackspot'; Aqualux will never need scrubbing, and has the lowest routine maintenance requirements of any pool finish.

Flexible and Strong

A hard pool shell can't handle ground movement - so where finishes like tile, render and fibreglass will crack, Aqualux can flex and return back to position. At .75mm it's the optimal thickness for maximum strength without compromising stretch and ease of installation. Capable of stretching up to 300%, it is ideal for sites with ground movement issues.

Beautiful Colours

Aqualux comes in a range of beautiful colours and prints, with a depth and vibrancy simply not available from other pool finishes. Premium quality pigments, and the addition of specialist UV inhibitors ensure colours stay brighter for longer - in fact, independent testing has shown Aqualux to have almost double the chlorine resistance of identical looking competitor products available in Australia.

Guaranteed

In a domestic setting, an Aqualux pool finish is guaranteed to keep a pool shell watertight for twelve years - and in the right conditions, most will last for years beyond this. See how Aqualux stacks up against alternative pool finishes below - it's the only one that ticks all the boxes!
