

How do you measure up?

Measurements for standard or non-standard liners are taken from the waterline. Please include all the dimensions listed including the depth and style (ie. flat base) of the deep-end.

Circular Pool shapes

Check the diameter of the pool in 3 places to confirm the exact size. List down all three dimensions.

Oval & Twinlake shapes

Check length of the pool and width at the widest point and the narrowest point to confirm the exact size. (The narrowest point is between the main side supports that are joined under the pool with cross bars or straps.)

Keyhole & Teardrop shapes

Check length of the pool and the width at the widest point, the narrowest point and the small end to confirm the exact size. (The narrowest point is between the main side supports that are joined under the pool with cross bars or straps.)

The smart choice for
your new **above ground**
pool liner

8
YEARS

WARRANTY

Why an ABGAL Liner?

One of the most important parts of an above ground pool is the liner. It needs to look good, be easy to maintain and should last for many seasons. The best investment you can make is the one which will give you the best return, and that's an ABGAL pool liner.

- Choice of colours and patterns
- Specialist 'smart seam' welding
- No flaps of vinyl at seams
- Treated to resist algae
- Ultra Violet stabilised
- Made in Australia
- Any shape, any size
- New and replacement liners

Choice of colours and patterns

ABGAL offers one of the largest ranges of colours and patterns available, as you can also opt to have your new above ground liner made from the thicker vinyl usually reserved for inground pools.

Easy to keep clean

Vinyl is naturally resistant to bacteria, but ABGAL liners are made from a special formulation with added fungicides to make it even harder for algae to take hold. And with their exclusive 'wedge weld', there are none of the creases or flaps you see on other liners, so not only is the join almost invisible, its cleaner too. There is literally nowhere for bacteria to hide!

Smart Seam

ABGAL revolutionised their seam process back in 2008. They took their own wedge weld, and made it better – half the size, while still being stronger than a traditional weld. With no excess material at the seams, 'Smart Seam' is more attractive and more hygienic than other seam options.

UV Inhibitors

All liners are treated to resist UV and protect your liner from damage caused by continued exposure to the sun. This ensures a longer life from your liner, and will keep it looking better longer!

All Shapes and Sizes

ABGAL manufacture a variety of standard sized liners to suit most popular brands of pool. When ordering, specify the brand and model of pool, and whether it is circular, oval, keyhole, twinlake, kidney or teardrop – 97% of pools are a standard size, and ABGAL have a pattern for all of them. The handful of liners that need to be custom made will generally cost a little more, and may need to be measured and fitted by a professional. Steps, benches and seats are easily built into custom liners.

Options for New Pools

If this is a new pool, ask to have the liner installed with 'Quick-Fix'. Once in, replacement liners can be snapped in easily, without touching the coping – perfect for liners which have been decked in like the one above.

Replacement Liners are easy

Any brand liner can be replaced with the ABGAL system - it doesn't matter what brand your pool is. Once ABGAL have manufactured your liner, the pattern is kept on file, making any replacements quick and easy.

What People Say

'I chose Maui and the colour is AMAZING. The pool looks great - I couldn't be happier.' Sharon, WA

'It looks superb. Lovely colour, and a neater fit than the previous liner. Will buy again.' M Thompson, VIC

'This is my first ABGAL liner, and I can see the quality is much better than the one that came with the pool.' M Walsh, QLD

'Our first ABGAL Liner lasted 19 years! Great to be able to buy Australian made.' Phillip C, NSW
